Subject: OECD Combined Exposure Project - Draft for Review - Deadline July 21

Dear Combined Exposure Project Team.

Please find attached the draft Guidance Document on Considerations for Assessing the Risks of Combined Exposure to Multiple Chemicals. Thank you to all the drafters for their work on the document!

Please use the [separate commenting template](#) and provide written comments using the template and not in track changes format in the document. In addition, the commenting template includes [specific questions on the draft document](#) that the secretariat is seeking feedback on. The document has undergone significant revision based on the comments received. Project team members are asked to ensure the new draft adequately takes into consideration their comments and earlier input provided in the context of now having a complete draft. A track changes version is available on the community site (link below). Note that the track changes version contains most (but not all) changes that were made to Area 1-3 based on the comments received. Further revisions for consistency, editing, ordering were done in the context of the complete document.

In particular, reviewers are asked to focus on Chapter 7, a new segment on risk characterisation and uncertainty, and provide input on aspects of this chapter that could be strengthened or where further guidance could be provided in this regard.

Although we have improved editorial aspects of this draft, the document will undergo editing, so please don't take the time to provide significant editorial comments.

The document will also be circulated to the Working Party on Hazard Assessment, Working Party on Exposure Assessment and Working Group on Pesticides for their input. Depending on the nature of the comments received, the document will be revised and circulated for endorsement of the two Working Parties in September/October 2017.

Provide comments on the draft document by 21 July 2017 to Eeva (eeva.leinala@oecd.org). In order to continue to move this document forward, please respect this timeline.

The pdf version and review template are attached. The other documents are available on the community site via the following links. If you have problems accessing the community site please contact Nausicaa Masi (Nausicaa.MASI@oecd.org).

Subject: OECD Combined Exposure Project - Update

Dear all.

I hope this email finds you well.

A short update on the OECD Combined Exposure Project.

We received significant amounts of comments on the previous draft of the first three sections. Thank you. This has resulted in a stronger update of the document whose various sections have been updated by either the secretariat, Canada, Australia and the JRC.

Canada and Sweden have completed a draft of Area 4 (Risk Characterisation and Uncertainty). Thank you to them for taking on the drafting.

The entire draft document will be circulated to you on Monday for your review. At the same time we will circulate the document to the Working Party on Hazard Assessment and the Working Party on Exposure Assessment for their review as well. These two groups are meeting mid-June and we will ask for their comments in the period following their meeting. Please coordinate with your delegates on the review. Also, the Working Group on Pesticides had indicated that they would be interesting in reviewing a draft of the document, so we will circulate to them the same time.

To facilitate the review, you will receive a commenting table in which to provide your comments (more instructions to come). This will also include some specific questions for your feedback. We will be asking for you to submit your comments by **21 July 2017**. In order that we can now proceed with finalising the entire document, we have provided this longer period so that all the comments can be received by this date. Please submit your comments prior to, or by this date.

The secretariat will also post a track changes version of Area1-3 of the document (rather messy) which includes most of the changes, except some post-track changes clean up and organisation. This is too large to circulate by email, so we will post it on the community site.

Thank you for your patience.

Kind regards,

-Eeva
